

AUGUST NEWSLETTER 2022

There are now 910 students attending our school and 64 on the waiting list. The students are so keen to learn, it is a pleasure to see, and they just love coming.

Next month we have a trainee teacher starting and he will train for 3 months, after that we hope to be able to take on some more students.

Thet Htet Hnin (Amy)

One of our students has just started training to become a doctor at the Medical University in Yangon. She has to study for 6 years to become qualified. This has always been her goal.

Another of our students is in her final year at Law University in Sittwe, and has only 4 months left before she is a qualified lawyer. She is totally committed to do the very best she can in her career.

TRAINING IN STRESS MANAGEMENT

All our teachers were given a 3-hour course by Counselling Corner, free of charge, on how to manage stress and have a healthy mindset, especially in difficult times.

We thank the Counsellor and Counselling Corner for offering this to our teachers, who gained a lot of knowledge which has helped them, and in turn, they can help any students that have problems with stress. www.counsellingcornermyanmar

HEALTHCARE

This month Min Phone San went to Yangon again to have the plasters on his legs and feet changed, and he has now been given a wheelchair which he loves. His mother will now be able to wheel him to pre-school, as he cannot walk that far.

Win Pa Pa went to Sittwe to have a new prosthetic leg fitted, as the last one was too small for her. The new leg was fitted by the Red Cross, so we only needed to pay for her and her mothers' transportation and accommodation, so we are very grateful to them.

Thet Pie Tun had to have another operation on his arm, but this time it was only a very small one and he is now in no more pain.

NGAPALI TRASH HEROES

Our students continue to collect the trash every Sunday for 1 hour as they want to keep their environment clean. At school, they learn about how important the environment is, and that by throwing the trash how it can pollute the land, rivers and the sea. For our very poor students whose parents are uneducated, they are trying to teach their parents how to dispose of the rubbish, and education is the key.

**WE BELIEVE THAT EACH STUDENT IS THE CREATOR OF THEIR OWN
FUTURE GIVEN THE RIGHT EDUCATION.**

**THANKS TO EACH AND EVERYONE OF YOU WHO ARE HELPING US
ACHIEVE THIS.**
