

Trash Hero Ngapali

On the 17th and 18th May, We had 2nd Myanmar Trash Hero Family meeting with all the chapters in Yangon. We learned from other chapters in Myanmar how they are dealing with the trash and we gave a

presentation about our situation and how we are dealing with it. Please see below

We are Trash Hero Ngapali. We started trash hero ngapali in September 12 2017. There are many chapters in Myanmar but we are the most active ones. We clean every Sunday no matter in any weather condition. We mostly clean the beach. Although we clean the beach every Sunday, there is still a lot of trash day by day. We must take good care of our beach. All the trash is being wash up on the beach day by day because of the lack of education. That's why we have been educating our students not to drop any trash anywhere and the disadvantages of trash. Our student and teachers collect trash as volunteers. Every week we could collect enormous amount of trash. Our goals are to keep our environment clean as much as we can and encourage more people and villagers to participate with us. Although we can't change the whole world, we will try our best and keep Ngapali clean.

(WE CLEAN, WE EDUCATE, WE CHANGE)

Aung Win and Chu Chu were selected to attend the World Environment Day conference in Nay Pyi Taw. They had a booth and Some of the authorities and general public attended the conference. They explained to them what we are doing as trash heroes in Ngapali.
